# JetMaster®

PHOTO PANEL

Print - Stick - Display

The **JetMaster Photo Panel** creates effortless impact for your images. A lightweight alternative to solid MDF display blocks, this photo mount has a pressure sensitive adhesive face and is available in a range of sizes with a choice of two smart matte edge finishes. JetMaster Photo Panels are simple to create and can be wall mounted or used as an attractive addition to any desk.

- Stylish frame free photo mount
- Choice of black or white matte edge finish
- Permenant pressure sensitive adhesive

## Print - Stick - Display

Assembly Instructions

To get the best results print your image to the size specified in the print size column of the table on the previous page. Experiment with a range of finishes on the face of your photo panel by printing your image on different medias.

**Step 1:**
Peel back a small section of the release liner.
Step 2:
Place the photo panel into the alignment frame and fold back part of the release liner
Step 3:
Position your image using the alignment frame.

Step 4:
Secure a corner of your print using the area of adhesive you exposed earlier

Step 5:
Remove the rest of the release liner and apply even pressure using a roller.

Step 6:
Place your photo panel face down on a cutting mat and use a rotary cutter or craft knife to remove the excess paper from the edges.

Step 7:
Insert the desk stand into one of the pre drilled holes on smaller frames or use the slits on the back of larger frames to display your finished photo panel

JetMaster Photo Panel Tools
Cutting Mats, Alignment Tools and Rollers are all available from JetMaster Display Systems, contact us for further details. Rotary Cutters and Craft Knives are available separately.
